DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by *Dishon et al.*

(6,166,801).

As to **claim 1**, Dishon discloses a system useful in photolithographically processing substrates, comprising:

a stage (20) for loading a subject;

an imaging section (22) that forms an image;

a shifting section (24) that implements relative shifting between the imaging section and the subject for measurement to shift the imaging section, the relative shifting being performed by shifting the imaging section without shifting the stage (col. 11, line 40-col. 12, line 6).

Allowable Subject Matter

Claims 2-5 are allowable over the prior art of record.

Art Unit: 2877

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, taken alone or in combination, fails to disclose or render obvious, a shape measuring apparatus that includes an aperture in a chassis wherein an end of the measurement section protrudes from the aperture toward the subject to be measured and a dustproof member disposed at the aperture, in combination with the rest of the limitations of claim 2.

Regarding claim 4, the prior art of record, taken alone or in combination, fails to disclose or render obvious a rotation drive section that rotates the illumination section and the light reception section while preserving a mutual positional relationship of the illumination section and the light reception section, without changing the measurement region, in combination with the rest of the limitations of the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
